

e-Learning

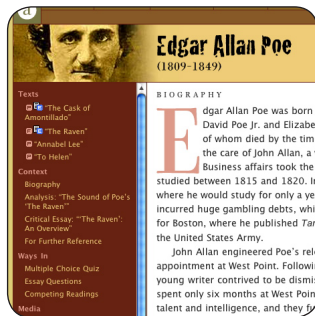

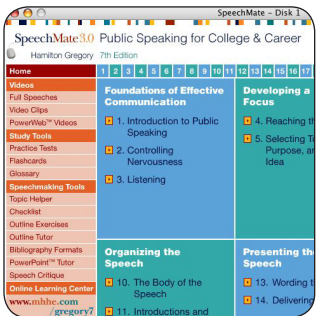

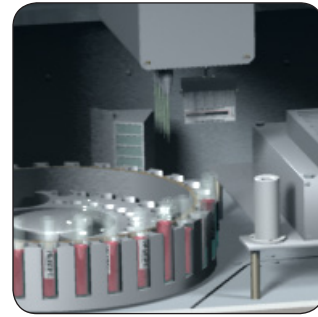

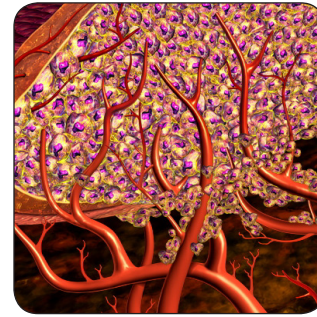

Sealworks can help you design and develop custom content, platforms or components for delivery via the web, cd-rom and digital devices.

Consulting
We can evaluate your systems and provide a detailed analysis on your current delivery, technology and usability. We provide recommendations for improving your content and platforms.

Instructional Design
Our team will work with you to define clear learning objectives, develop innovative ways to deliver the content and ensure improved learning results.

Design & Usability
Our design teams focus on your audience to insure the highest quality design and usability for your audience.

Development
Sealworks designs and delivers applications, platforms and work flows which can be plugged into existing technology or launched as a new platform.
